

APPENDIX F

IFA CONSTRUCTION SIGN

All developments receiving Low Income Housing Tax Credits are required to produce and display an IFA Construction Sign during the construction period of the development.

IFA will provide the electronic art files and sign specifications for developers to send to the sign company/printer of their choice. There are two file formats available to download as per the sign maker's requirements: vector-based EPS and PDF files. All files will be created to the exact dimensions, will be high resolution (300dpi) and zipped for downloadability. Electronic art files and sign specifications will be available on the IFA website at www.iowaFinanceAuthority.gov beginning in March 2009.
